These glazes are a series of related, clean clear colors which fit Standard Ceramic #103, #104, #105 and #417 clays as well as most other low fire bodies. They may be altered by adding 8% to 10% Superpax for an opaque look. Apply by dipping, pouring, spraying or brushing. All glazes are in dry form. To liquify the NL colors, mix approximately 1 pint of water with 1 pound of dry glaze. For the NLM colors, mix approximately 12 oz. water with 1 pound of glaze. Adjust according to application method used. Safe for functional ceramics.

For MSDS information see: <http://standardceramic.com/MSDSglazes.html>

Tableware producers must have all finished ware tested and approved as safe for dinnerware through a certified laboratory due to possible variations in firing temperature and possible contamination.
